PROFESSIONAL SUMMARY

Software Engineering graduate with practical experience in developing, deploying and maintaining web-based applications, alongside hands-on experience in cloud infrastructure, database management, data engineering and enterprise IT operations. Skilled in building backend solutions, integrating RESTful APIs, working with SQL and NoSQL databases, and implementing version control and CI/CD workflows. Experienced in data warehousing, data modelling and developing business intelligence reports. Combines software development capabilities with a strong understanding of IT infrastructure, cybersecurity and technical support, supported by practical industry experience and a commitment to continuous professional development.

WORK EXPERIENCE

Freelance Software Developer, Backend Development and Data Solutions **April 2024 to Present**
Remote

- Develop and deploy backend solutions using JavaScript and Node.js (Express.js), building RESTful APIs to support business applications, data exchange and system integrations. Manage the application lifecycle, including configuration, deployment, monitoring and post-launch maintenance.
- Design, integrate and manage relational and NoSQL databases, primarily SQL and MongoDB, with emphasis on database integrity, ACID transaction properties, efficient data organisation and reliable data operations.
- Design and develop small-to-medium-scale data warehouses for SMEs, particularly retail chains, supermarkets and educational institutions, using the Medallion Architecture (Bronze, Silver and Gold layers) to ingest, clean, transform and organise business data for analytical use.
- Perform data modelling and develop interactive Power BI dashboards and reports, translating operational and financial data into meaningful KPIs that help business owners and managers monitor performance, identify trends and make informed decisions.
- Manage application deployment and maintenance using AWS cloud services, Git version control and CI/CD workflows. Apply cybersecurity best practices, including secure configuration, credential protection, access control and system maintenance.

IT Assistant (Part-time) **August 2025 to January 2026**
Keight Wellness Therapy & Coaching, Nairobi

- Maintained and optimised the company's website through caching and image compression, improving page load performance and overall user experience.
- Provided first-line IT support to staff, diagnosing and resolving hardware and software issues in plain, non-technical language to minimise operational downtime.
- Designed digital and print advertisement materials aligned with the company's brand identity using Alight Motion as the primary tool.

ICT Intern, Networks and Infrastructure Department **May 2023 to August 2023**
Nairobi City Water and Sewerage Company Ltd (NCWSC)

- Provided first-line technical support to NCWSC staff across hardware, software and networking issues, diagnosing faults, assisting users and escalating complex issues where necessary.
- Installed, configured and maintained enterprise software and security applications, including Oracle DB, SPMS, Windows OS, BASIS II, Microsoft Outlook, Utility Master, and Kaspersky and Bitdefender antivirus.
- Performed computer configuration and preventive hardware maintenance, including setting up workstations for new users, replacing faulty peripherals, maintaining printers, and testing and labelling Ethernet cables.
- Configured proxy settings, IP addresses, domain names and port numbers, and diagnosed network connectivity issues using tools such as ipconfig and ping. Resolved network faults, printer connectivity problems, slow system performance and IP address assignment issues.
- Configured the company-wide Helpdesk application for password reset and domain-level account requests, conducted GIS data analysis using database queries and filters, and exported results to Excel for billing and customer data management.

EDUCATION

Bachelor of Science in Software Engineering **January 2019 to April 2024**
Murang'a University of Technology

- Classification: Second Class Honours (Upper Division)

CERTIFICATIONS

- AWS Infrastructure Fundamentals, July 2026
- Networking Essentials, Cisco Networking Academy, 2022
- Network Devices Configuration, Cisco Networking Academy, 2022

TECHNICAL SKILLS

Software Development: HTML, CSS, JavaScript, Python, backend development and RESTful API development.

Databases and Data Engineering: SQL, MongoDB, Oracle DB, database management, data modelling, data pipelines, OLTP and OLAP, and Medallion Architecture.

Business Intelligence and Analytics: Power BI, data analysis, KPI reporting and business intelligence dashboards.

Cloud and DevOps: AWS, Git, GitHub Actions, CI/CD workflows and cloud application deployment.

Networking and Infrastructure: LAN configuration, DNS, DHCP, IP addressing and network troubleshooting.

Systems and IT Operations: Windows administration, hardware and software troubleshooting, enterprise application deployment and helpdesk support.

Cybersecurity: Cybersecurity fundamentals, patch management, antivirus administration, secure configuration and access management.

INTERESTS

Backend development, particularly API optimisation; SQL; open-source software and emerging technologies; and technology communities and professional development.
